

Sign electronically via computer mouse, stylus, or tablet, directly from the Prognosis application

- **Cost Effective**
Sign directly from devices like your iPad, Android Tab, desktop, or laptop instead of relying on expensive signature pads
- **Ease of Use and Access**
Multiple users can simultaneously use Prognosis to obtain the signatures of multiple patients in the clinic
- **Compatibility**
Completely compatible with the current version of Prognosis and the latest internet browsers
- **Portal Integration**
Patients can sign documents from anywhere using the Prognosis Patient Portal

Details available at prognosis.com/prognosis

Free Prognosis EMR
iPhone & iPad App:

Why Choose Prognosis?

A simple, cost-effective solution with a one-time fee

Avoid the hefty fees of external hardware

Save time without the hassle of software installation

Read the document and sign directly within Prognosis from any device in the clinic or from home

Document Completion With Patient Portal

Clinic sends document to patient before visit

Patient signs document via Patient Portal

Document is promptly sent back to the clinic
