

# PATIENT PORTAL APP & SOFTWARE

Prognosis Patient Portal and App provides a secure and convenient means to enhance communication for patient and provider

## BENEFITS FOR YOUR PRACTICE

### **Registration and Intake**

Patients are able to complete their registration, enter insurance information, complete intake forms and sign consent forms from the portal.

### **Book Appointments**

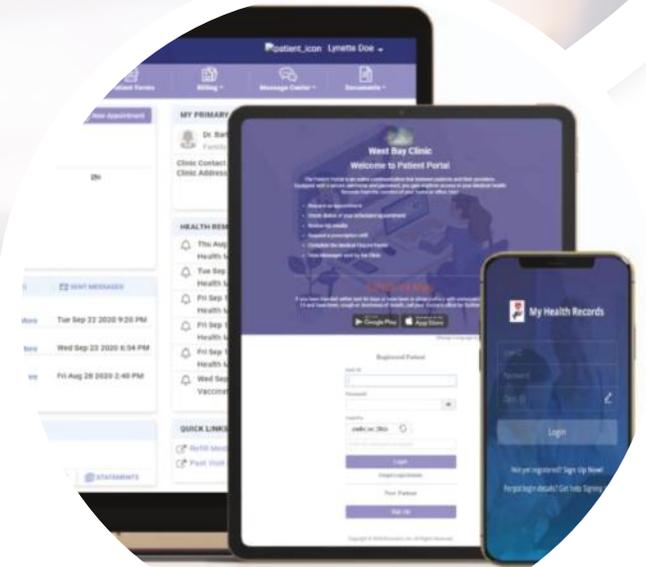

Allows patients to view past, present, and future appointments and well as schedule new appointments

### **Accessibility**

Provides patients accessibility to their medical records, medication information, appointments, and billing information 24/7 whenever and wherever they need it

### **Secure Transactions**

Provides a HIPAA secure way of communicating and sharing documents.

## WHY CHOOSE PROGNOSIS?

Prognosis provides the tools you need to enhance the overall patient experience. By providing patient portal and patient app, patients can access their medical records, medication information and request refills, review labs, send secure messages, pay bills online and more.

By having patients complete this registration and intake forms on-line, it will save time once they arrive in the office, reducing wait time and registration errors.

Patients having access to their financial information such as charges, statements and payments on-line will help them to understand the balance due, reducing phone calls and questions. They can conveniently make payments online.

# PROGNOCIS PATIENT PORTAL AND APP

PrognocIS Patient Portal and App provides a HIPAA secure means of improving Patient and Provider relationship through secure messaging and document sharing. It provides patients access to their medical records 24/7 from anywhere on any device. They are not only able to view documents shared with them, but they can share documents with the provider. With the secure messaging feature, patients can send a message to the provider whenever it comes to mind.

Patients are able to view their medication list and send refill request to their provider. View appointments, and request or schedule new appointments. Virtual Consultations can be held through the patient portal and the App.

Patients have access to all their billing and payment information. They can view their statements and pay their bills online.

## TELEMEDICINE

Telemedicine consultations can be conducted using both the patient portal and the app. It provides real-time face to face consultations between patients and providers. It sends reminders of appointments to both provider and patients.

It provides an excellent means of providing treatment for patients who require urgent or diagnostic treatment. Patients who many have mobility issues, seniors who require in-home remote monitoring or patients in remote areas with limited treatment options.

Customized telemed apps are available.

## TOP FEATURES

**Online Registration and Demographics** updates save a considerable amount of time for the front office

**Book and View Appointments** makes keeping up with appointments easy

**Upload, Download and View** Shared Documents in a secure manner

**Medication Monitoring and Online Refill Request** sends refill requests from the patient to the provider

**Online Bill Pay** is a convenient way to pay bills and reduce posting errors

**Virtual Consultants** provide provider-patient communication while reducing administrative cost

**Secure Messaging** enhances patient-provider communication

## PRO CHECKIN
