

MULTI-SPECIALTY SOFTWARE

Our Innovative Software helps Multi-Specialty Practices work seamlessly together.

BENEFITS FOR YOUR PRACTICE

Customizable Templates and Workflows

PrognoCIS enables providers to efficiently navigate and document notes by offering customizable templates and workflows tailored to both specialty and individual provider preferences.

Pre-Authorization Tracking Tool

Our Pre-Authorization tracking tool allows for tracking and monitoring authorizations to ensure authorizations are obtained and payment for services are rendered.

Interoperability

PrognoCIS interfaces with a wide variety of labs, radiology companies, vaccines registries, and more. We also have a list of device interfaces available.

Medical Billing

Our automated medical billing system will autogenerate claims when the encounter is closed, speeding up the revenue process!

WHY CHOOSE PROGNOCIS?

PrognoCIS allows multi-specialty offices to collaborate effortlessly in a single database, with customizable templates, workflows, schedules, and more that can be tailored to individual provider preferences or specialties.

Staff can be assigned to individual providers, eliminating the hassle of sorting through others provider's documents and messages that do not apply to them, saving valuable time.

PrognoCIS provides flexible documentation options, including templates, free text, smart phrases, and voice dictation, to cater to varying provider preferences, with the ability to customize progress note outputs accordingly

Our integration with Population Health allows the providers to track and report on the MIPS/MACRA measures appropriate for their specialty.

PROGNOCIS EHR

PrognocIS offers customizable templates, notes, macros, and dragon dictation for advanced charting, allowing providers to adapt to their unique workflows and needs.

Practice management tools streamline tasks and processes to meet patient and insurance demands, maximizing gains on investments and ensuring smooth operation.

Our patient engagement tools, like portals, apps, reminders, education, secure messages, refill requests, and more, empower patients to take an active role in their care.

We are compatible across all devices, and with our secure web-based cloud servers we can be accessed from anywhere.
