

# INTERNAL MEDICINE EHR

Efficient Care and Comprehensive  
Management with Prognosis Internal  
Medicine EHR

## BENEFITS FOR YOUR PRACTICE

### Customizable Templates

We provide the ability to customize and code your templates for accurate documentation and coding in minutes.

### E-Prescribing

Built-in E-Prescribing, certified for E-Prescribing of controlled substances along with EPA – Electronic Prescription Authorization.

### Billing

Our automated billing system will autogenerate claims when the encounter is closed, speeding up the revenue process!

### Interoperability

Integrates with eRX, Labs, Radiology, Vaccine Registries, Portals and more, speeding up and providing quality patient care.

### Patient Portal

Enables patients to access and share documents, request appointments and refills, communicate with provider and management this billing account.

## WHY CHOOSE PROGNOSIS?

Prognosis offers comprehensive features for patient care and office efficiency. With customizable templates, workflows, electronic eligibility, appointment reminders, prior authorization tracking, e-prescribing, automated billing, and more.

Prognosis makes it possible to share data with Labs, Radiology, Pharmacies and Vaccines registries. Our portals and telemedicine options help to improve communication and documentation sharing, improving overall patient care.

Our software has a variety of decision support tools such as health maintenance, drug interaction alerts, clinical guidelines, and risk calculators.

Our Report Dashboards have reporting and analytics capabilities to help track patient outcomes and identify improvement activities
