

NEUROLOGY EHR SOFTWARE

Optimize patient care and office efficiency with an EHR that is finely tuned for Neurology.

BENEFITS FOR YOUR PRACTICE

Customizable Neurology Templates

We provide a complete library of neurology-related templates such as headaches, cognitive difficulties, nerve blocks, and more.

Interoperability

We offer interoperability with Labs, Radiology companies, other Healthcare Professionals, and Diagnostic Equipment.

E-Prescribing / Medication Management

Built-in E-Prescribing Medication Management tools. Alerts for drug allergies and contraindications.

Patient Portal

Enhanced patient engagement with shared documentation, appointment requests, prescription refills, and online bill payments for managing patient accounts.

Telemedicine

Integrated Telemedicine features for remote consultations for follow-up appointments and monitoring patient's progress without requiring in-person visits.

WHY CHOOSE PROGNOSIS?

Prognosis offers comprehensive features for patient care and office efficiency. With Customizable templates, workflows, electronic eligibility, appointment reminders, prior authorization tracking, e-prescribing, automated billing, and more.

Prognosis makes it possible to share data with Labs, Radiology, and Pharmacies electronically. Our portals and telemedicine features improve communication and documentation sharing as well as overall patient care.

Our software offers alerts and reminders for follow-up appointments, medication adherence, and other important tasks to aid providers in staying organized and ensuring timely patient care.

Our report dashboards have reporting and analytic capabilities to help track patient outcomes and identify improvement activities.
